

EMINENCE[®]
SIDING

Peace of mind.

DESIGNED TO PERFORM

LIKE NO OTHER.

When you want your home to look its best, you need a premium product that delivers exceptional performance too. Vytec Eminence® siding delivers with tough, reliable and beautiful siding that keeps your home looking its best year after year. Designed for strength and durability, Eminence ensures your home's exterior will stand up no matter what the season or weather.

First choose your profile.

Your siding's profile is a subtle but important design element that adds depth and dimension to your home's exterior. Some siding, like traditional wood clapboard, has a straight profile. Other styles have a slightly rounded edge at the top of each panel, like our Dutch Lap style. You can choose Eminence in both styles.

- Clapboard-style panels have a clean, crisp look that suits most any home style.
- Dutch Lap siding provides a softer, vintage appearance.

Double 4 & 4.5 Dutch Lap Double 4 Traditional

An elegant woodgrain says it all.

Eminence siding offers a rich woodgrain that recreates the look of real wood. Darker colors give a more dramatic grain effect, while lighter colors offer subtlety. In either case, the result is a great first impression every time.

Now think about color.

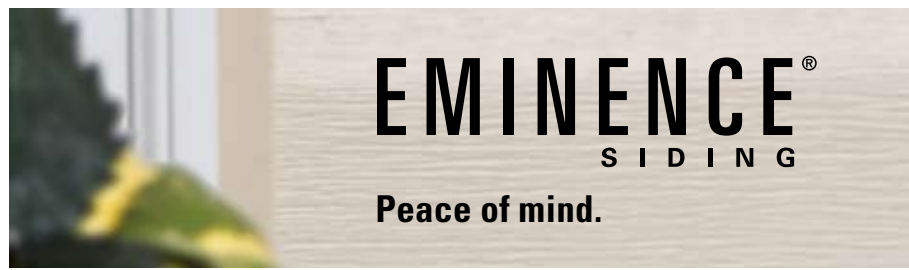

When you choose Vytec siding you not only get a wide range of color choices, you also get our exclusive TruColor® Protection Technology. This exclusive color protection formula ensures that your siding color will stay true year after year. Here are a few tips to help you choose a color you love.

- Mix and match: A great color combination is one that pairs a darker main color for the walls with a lighter color for accents and trim.
- Be bold: Colors such as green and blue can make your home a showpiece and give it plenty of curb appeal.
- Look up: Don't forget to consider the color of your roof. Designers suggest complementing your siding color to an accent color in your roof shingles.

Accessories complete the picture.

Accessories like corner posts and soffit are essential to any vinyl siding installation. But adding elements like shakes, scallops or board & batten can take your home's exterior design up a notch. Vytec's Finishing Elements® accent pieces let you choose the look that's right for your home, while providing virtually maintenance-free durability and lasting performance.

Colors throughout this brochure are simulated. Consult product samples before final selection.

THE ANATOMY OF VINYL SIDING.

Not all vinyl siding is created equal. Eminence siding has a wealth of performance-enhancing features that ensure reliable performance and great looks for a lifetime.

Double-thick nailing hem adds strength where the panel attaches to the wall, so it stands up to heavy wind loads.

Smooth nailing hem with burr-free nail slots helps increase performance on the wall.

Exclusive Gorilla-Lok® locking system adds strength and rigidity, which helps siding hang straight and span wall imperfections.

.046" panel thickness ensures precise dimensional consistency for a snug fit and tight laps.

Enhanced shadow lines create the look of real wood.

Deep ¾" panel projection enhances panel rigidity and produces attractive shadow lines.

Exclusive TruColor® Protection Technology keeps color looking its best year after year.

THE PROS TRUST VYTEC

When it comes to the products he sells, your contractor makes his choices as carefully as you would. That's why he chooses vinyl siding from Vytec. At Vytec, we stand behind the products we make. Continued advancements make us a manufacturer you can rely on for innovative, high performing products. It's this dedication to our craft that makes Vytec a partner your contractor can trust – and one you can trust, too.
