

PRESTIGE[®]
SIDING
Tough performance. Great looks.

MAKE YOUR HOME

ONE OF A KIND.

Designing your home's exterior is a great chance to express your personal sense of style. With Prestige siding from Vytec, finding the right color and style is simple. And you can rest assured that you're choosing siding built to last.

Start with the profile.

The siding profile is the shape of the panel, whether it's straight like traditional wood clapboard, or has a gentle curve on the top of the panel, a style called Dutch Lap. Prestige siding comes in both styles. Your contractor can help you choose the panel that's best for your home.

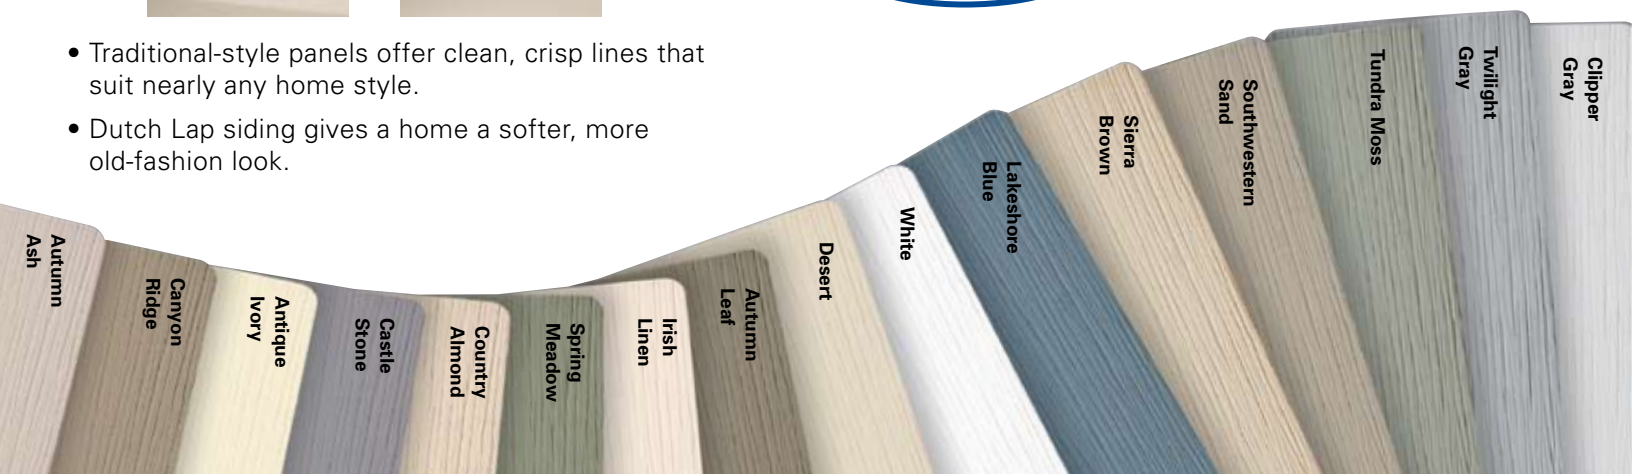

- Traditional-style panels offer clean, crisp lines that suit nearly any home style.
- Dutch Lap siding gives a home a softer, more old-fashion look.

Next choose your color.

With Vytec vinyl siding you won't get just any color, you'll get the right color. Our siding is protected by our exclusive TruColor® Protection Technology, which ensures that the siding color will remain true for years to come. Here are a few tips for choosing color:

- Light colors can make a smaller home look larger, while dark colors can make a large home look less imposing.

- Use a darker color for the main walls of your home and a lighter accent color on dormers or gable peaks for a more dramatic design.
- Don't be afraid to use colors like green or blue to set your home apart.
- Be sure to consider your roof color. For best results, choose a siding color that matches an accent color in your shingles.

Take a look at the woodgrain.

Prestige siding has a natural oak woodgrain that adds handcrafted style to your home's exterior. The grain may be more apparent on darker colors and less apparent on lighter colors. Either way, this great look will add beauty and curb appeal to your home's exterior.

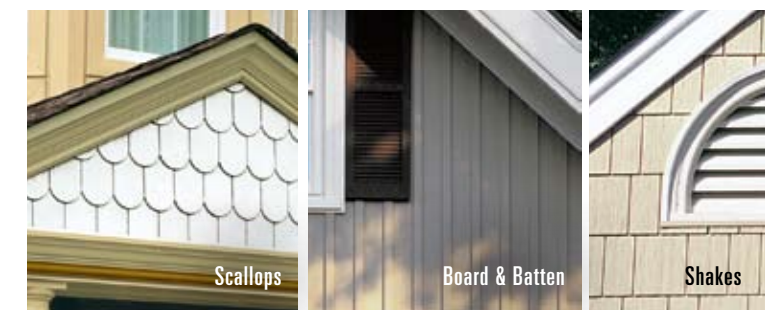

Accessories complete the picture.

Accessories like corner posts and soffit are essential to any vinyl siding installation. But adding elements like shakes, scallops or board & batten can take your home's exterior design up a notch. Vytec's Finishing Elements® accent pieces let you choose the look that's right for your home, while providing virtually maintenance-free durability and lasting performance.

EXPRESS YOURSELF WITH BOLD COLOR.

You can give your home a dramatic new design when you choose one of our Expressions™ colors. Inspired by nature and created exclusively for Vytec, this rich palette of bold colors can give your home's exterior a striking new look. Add accessories in a contrasting color for a design that makes a statement.

Colors throughout this brochure are simulated. Consult product samples before final selection.

THE ANATOMY OF VINYL SIDING.

Not all vinyl siding is created equal. Prestige siding has a wealth of performance-enhancing features that ensure reliable performance and great looks for years to come.

Double-thick nailing hem with burr-free nailing slots adds strength where the panel meets the wall.

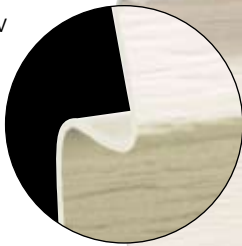

Posilok® locking system holds panels securely, while allowing expansion and contraction in changing temperatures.

Rich wood grain has the look and feel of freshly painted wood.

Deep, realistic panel projection creates enhanced shadow lines that look more like real wood.

.044" thickness offers lasting strength, while precise dimensional consistency ensures a snug fit and tight laps.

Choice of profiles:
D4.5DL, D5DL or D4.5

THE PROS TRUST VYTEC

When it comes to the products he sells, your contractor makes his choices as carefully as you would. That's why he chooses vinyl siding from Vytec. At Vytec, we stand behind the products we make. Continued advancements make us a manufacturer you can rely on for innovative, high performing products. It's this dedication to our craft that makes Vytec a partner your contractor can trust – and one you can trust, too.
