CREATING THE LOOK

PROSIDE[®] LG
SIDING

The professional's choice.

THAT SAYS HOME.

Choosing your home's exterior design can seem like a huge decision. But at Vytec, we think it's a decision you should feel good about. When you choose Proside LG siding from Vytec, you're choosing a product that's proven to perform in every way.

Choose your profile first.

The profile of your siding refers to the style of the panel, whether it's straight like traditional wood clapboard, or has a gentle curve on the top of the panel, a style called Dutch Lap. Proside LG siding comes in both styles, in a variety of panel sizes. Your contractor can help you choose the panel size that's most appropriate for your home.

- Clapboard-style panels offer clean, crisp lines that suit nearly any home style.
- Dutch Lap siding gives a home a softer, more old-fashioned look.

Now think about the color.

Today's vinyl siding offers a broad spectrum of colors to choose from. Here are a few tips to consider when choosing colors for your home.

- Light colors can make a smaller home look larger, while darker colors can make a large home look less imposing.
- Consider choosing a darker main color for the walls of your home, and a lighter accent color to draw attention to features like dormers.

- Don't be afraid to use colors like green or blue to set your home apart from others in the neighborhood.
- Be sure to consider your roof color. For best results, choose a siding color that matches an accent color in your shingles.

Take note of the woodgrain.

Proside LG siding offers a subtle, elegant maple woodgrain that looks like freshly-painted wood. The grain may be more apparent on darker colors and less apparent on lighter colors. Either way, this attractive woodgrain will add beauty and curb appeal to your home's exterior.

Accessories complete the picture.

Accessories like corner posts and soffit are essential to any vinyl siding installation. But adding elements like shakes can take your home's exterior design up a notch.

THE ANATOMY OF VINYL SIDING.

Not all vinyl siding is created equal. Proside LG siding has a wealth of performance-enhancing features that ensure reliable performance and great looks for a lifetime.

Smooth nailing hem and burr-free nail slots add strength where the panel meets the wall.

Posilok® locking system holds panels securely, while allowing expansion and contraction in changing temperatures.

.042" thickness offers lasting toughness, while precise dimensional consistency ensures a snug fit and tight laps.

Enhanced shadow lines create a look that's more like real wood.
