

# YUKON BOARD<sup>®</sup>

PERFORMANCE INSULATED SIDING

# EXTREME BEAUTY MEETS EXTREME PERFORMANCE.

Yukon Board® premium siding can do more for your home than just make it look great. This high-performance siding can help keep your home cooler in the summer and warmer in the winter, thanks to an insulating panel that's laminated to the back of the siding. This unique design lets you create a beautiful home exterior, while also helping to save energy.

Our exclusive Posilok® locking system holds panels securely, while allowing expansion and contraction in changing temperatures.

Thick .044" panel offers lasting toughness, while precise dimensional consistency ensures a snug fit and tight laps.

Deep, realistic panel projection creates enhanced shadow lines that look more like real wood.

High performance laminated foam adds a layer of protection that provides outstanding impact resistance while allowing vapor to escape through the foam, keeping moisture away from the interior walls.

Rigid foam insulation helps reduce heating and cooling costs.

The rolled-over nailing hem adds strength where the panel is attached to the wall, helping to resist hurricane strength wind loads.

A natural additive in the insulation improves termite and insect resistance and is made from borate, so it's harmless to humans and pets.

Rich woodgrain has the look and feel of freshly painted wood.

PERFORMANCE INSULATED SIDING

D6 Traditional

D5 Dutch Lap

The insulated core of Yukon Board® Siding can help meet the performance guidelines of an ENERGY STAR new home.

## Distinctive wide panel design.

The broad 6" flat face of Yukon Board is designed to look like real wood, lending timeless style to homes ranging from colonial to contemporary. With a deep panel projection and elegant woodgrain, this wide panel design can set your home's exterior design apart. You may also choose our 5" Dutch Lap style, a bevelled panel with a more traditional appearance.

## Colors that make a statement.

With Vytec, you get more than just color. You

get TruColor®, our exclusive color protection technology that protects siding from fading or discoloring, ensuring your home will always look its best. Here are a few tips to help you choose color with confidence.

- Use a lighter color for the walls and a darker contrasting color to accent dormers or gables.
- Be bold and consider using colors to set your home apart.
- Remember your roof – siding that matches an accent color in your shingle will be most pleasing to the eye.

## Accessories pull it all together.

The distinctive style of Yukon Board will look its best when you add our specially designed Yukon accessories, as well as shakes and scallops. All our accessories provide virtually maintenance-free durability and lasting performance, while giving you a truly custom exterior design.
